--Brief description of the drawing

Fig. 1 depicts an electrical module bonded to a card body with the adhesive sheet of the invention.--

Paragraph beginning on page 6, line 26 (amended):

In a further preferred embodiment of the pressure-sensitive adhesive tape of the invention use is made for layer ~~i~~ (1) of polyolefins, especially poly- $\alpha$ -olefins, which have a softening range of greater than 65°C and less than 125°C and which likewise resolidify after adhesive bonding, in the course of cooling. The company Degussa makes a number of different heat-activable poly- $\alpha$ -olefins available commercially under the trade name Vestoplast<sup>TM</sup>.
